

1. LDAP Server APIs	3
1.1 Setup LDAP Server: set_ldapserver	5
1.2 Initialize LDAP Database: init_ldap_db	6
1.2.1 Check User Password: checkpw	6
1.2.2 Start initializing: Init	7
1.3 List Groups: getLdapGroupList	8
1.4 Create Groups: createLdapGroup	9
1.4.1 Add New Group: add_group	9
1.4.2 List Users: list_add_user	10
1.5 Edit Group: editLdapGroup	11
1.5.1 Start Editing: edit_group	13
1.6 Detete Group: deleteLdapGroup	14
1.7 List Users: getLdapUserList	15
1.8 Create User: createLdapUser	16
1.8.1 Add New User: add_user	18
1.8.2 List Group: list_add_group	19
1.9 Change User Password: changeLdapUserPw	20
1.10 Edit User Properties: editLdapUserProperties	21
1.10.1 Edit User: edit_user	22
1.11 Edit User Group: editLdapUserGroup	24
1.11.1 Start Editing: edit_user_group	25
1.12 Delete User: deleteLdapUser	26
1.13 Create Multi-Users: createMultiUser	26
1.13.1 Add Multi-Users: add_multi_user	27
1.13.2 Get Progress: get_add_user_progress	28
1.14 Import Users: importLdapUser	30
1.14.1 Import Users by CGI: do_import	30
1.14.2 Import Users by uploading File: do_upload	31
1.14.3 Get Upload Result: upload_result	32
1.14.4 Check Password: checkpw	33
1.15 Check User: checkLdapUser	33
1.16 Check Group: checkLdapGroup	34
1.17 Backup / Restore Database: backup_restore_ldap_db	35
